State Eng. Office Bob Fatheringham Logan, Utah

Dear Sir:

In a recent telephone conversation with Kent Jones at your SLC office, we were able to get some valuable answers to questions that have concerned Lewiston City for some time. The main question being, why is Lewiston the only entity receiving water from the Hi Bear Spring with a metering device? Of the five or six others that draw water from this source, there are no other devices that can accurately record the flows. Mr. Jones said that State Statute #7354 requires this on all water systems.

We have no problem with who the other organizations are, nor the amount of water that has been legally assigned to them. We only feel that this system should actually show and have recorded what it actually produces there. We also feel that this is a good time to do this now because it seems to be on everyones mind after the hearings that just concluded in your office.

We know that this may not set well with the other people involved, but our concerns are for the future and protection of the water that is supplied from the Hi Bear area. Please consider our request and let us know if we can help in any way.
